----------------	-----------	--------------------------------	--------------------------	------------------------

In case of doubt between black and red, red is used (red is worst than black).

AV removed from table: Detekt (not an AV).Note: if with blacklisted av some popup appears, the color is red (red is worst than black).

- AV rows not filled-in because we test the antivirus only under Win 8.1 (360 Safe, Comodo, Fortinet, IOBit, Norman, Trend Micro, ZoneAlarm).
- AV rows not filled-in because we do not currently test the AntiVirus (Malware Bytes).
