

Qualcomm Statement Regarding Alliance for Open Media Patent License 1.0

“Qualcomm is a leader in foundational video compression technology. For over 20 years, we have invented technology widely used in video codecs implemented and used by devices and content services. Our patent portfolio is used in multiple codecs and includes standard essential patents to H.265/HEVC, H.266/VVC, and MPEG-5/EVC video coding standards, as well as the proprietary VP9 and AV1 video codecs.

Regarding the Alliance for Open Media (AOM) Patent License 1.0, Qualcomm has not accepted the unilateral terms asserted by AOM with respect to Qualcomm’s intellectual property and has notified AOM of this position. Qualcomm reserves all its intellectual property rights, including with respect to the use of any of Qualcomm’s patented technology to implement any AOM specification.”
